Peptide Science

Subject Index to Volume 43

Alpha-casein exorphins, 99
Alpha-lactorphins, 99
Alzheimer's disease, 157
Amino acid sequences, 139
Amphipathic helices, 419
Angiotensin I converting enzyme, 129
Anticancer drug design, 25
Antifungal therapy, 43
Antigen, 323
Antigen presentation, 269, 303
Antihypertensive peptides, 129
Autoimmune diseases, 323

Beta-casomorphins, 99
Beta-casorphin, 99
Beta-lactorphin, 99
Bioactive peptides, 119
Bombolitins, 419
Bone marrow, 139
Brain, 157

Calmodulin, 135
Calmodulin, 157
Candida albicans, 43
Casoxin A, B, C or D, 99
^{13}C chemical shifts, 413
CD4, 367
CD4 dimerization/ oligomerization, 367
Cell differentiation, 139
Cerebellin, 157
Cerebellum, 157
Cerebral cortex, 157
Chi space, 219
Class II histocompatibility glycoproteins, 303
Combinatorial chemistry, 383
Computer screening, 367
Conformation, 419
Conformational analysis, 191
Coronary constriction, 135
Costructure, 383
Crystallography, 281
Cysteine sulfur, 3
Cytokines, 323

Dipeptide mimetics, 191
Distance parameters, 191
Drug discovery, 367

Endogenous peptides, 139
Enzymatic hydrolysate, 129
Epidermal growth factor, 339

Farnesylated peptides, 3
Farnesylated proteins, 3
Farnesyltransferase, 25
Food proteins, 129
Functional foods, 119

Geranylgeranylated peptides, 3
Geranylgeranylated proteins, 3
Growth factor receptors, 339
GTPase, 25

Helical ensemble, 413
Helix–helix transition, 405
Hemoglobin, 75, 147, 157
Hemoglobin fragments, 135, 139
Hemoglobin proteolysis in vivo, 171
Hemoglobin-derived peptides, 171
Hemorphins, 135, 147
High performance liquid chromatography, 157
^{2}H-nmr method, 405
HPLC, 75
Hyporesponsiveness, 323
Hypothalamic peptides, 135

Immune response, 367
Immunoglobulin superfamily, 367
Immunoregulation, 139
Inflammation, 323
Insulin, 339
Insulin growth factor, 339
Ischemia, 157

Lactoferroxins, 99
Left-handed α-helix, 405
Lipidation, 15
Lipopeptides, 15
Lipopeptide–membrane interactions, 15
Lyotropic liquid crystalline state, 405
Lytic peptides, 419

Macrophages, 75
Major histocompatibility complex, 281
Mechanisms, 367
Membranes, 15
MHC class II, 367
Milk opioids, 99
Milk proteins, 99, 119
Molecular data base, 367
MyristoylCoA:protein N-myristoyltransferase, 43

N-capping, 413
Nerve growth factor, 339
Neurotrophin, 339
Nonpeptide organic inhibitors, 367

Opioid peptides, 75
Opioid peptides, 99, 147
Opioid receptor ligands, 99
Oral administration of protein, 323
Oral tolerance, 323

PEP-19, 157
Pepsin, 75
Peptide binding, 281, 303
Peptide esters, 3
Peptide excretion from erythrocytes, 171
Peptide inhibitors, 367
Peptide isolation, 139
Peptides, 219
Peptidic inhibitors, 43

Peptidomimetic inhibitors, 43
Peptidomimetic modifications, 367
Peptidomimetics, 25, 219
Peptidyl-thioethers, 3
Phage display, 383
Poly(β-phenethyl see under L-asparate, 405
Prenylated peptides, 3
Pro-rich peptide, 383
Proteasome inhibitors, 269
Protein degradation, 269
Protein interactions, 367
Proteins, 157, 219
Proteolysis, 269

Ras, 25
Regulatory T cells, 323
Right-handed α-helix, 405

SH3 (Src homology 3) domain, 383
Signal transduction, 25
Stroke, 157
Structure-based drug design, 383
Structures, 367

T cell activation, 367
1,1,2,2-tetrachloroethane, 405
Thioether, 3
Tissue homeostasis, 171
Tissue specific peptide pool, 171
Torsion angle parameters, 191
Transforming growth factor—α, 339
Tyrosine kinase, 339

Ubiquitin, 157
